Instructions

In preparation for my talk and workshop on Monday, February 24, 2020, you may find it useful to have a look at some of the following materials. For each part of the project, I have provided a short introductory video that explains the aspect and its connection to the other pieces. You may have also received some of the handouts as pdfs. I will bring hard copies for all at the talk/workshop. If questions come up, do not hesitate to send me an e-mail. Note: following the creation of the videos, I discovered that the reflection that I provided allowed me to revise and adapt some of the project components.
